CodeAudit

Cost analysis report

Generated 2026-10-28 · Owner: demo@example.com

Reporting currency: USD · 3 cost items

Total estimated	Total actual
$3,300.00	$3,130.00

Variance	% Variance
-$170.00	-5.2%

Items over budget
1 of 3

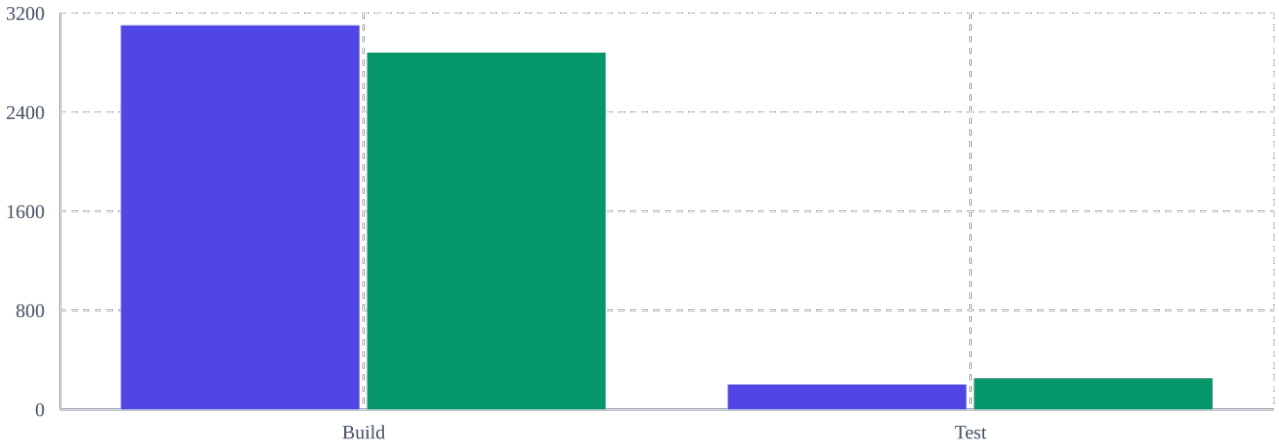

Data sources used

codeaudit.csv

0 items have a missing estimate or actual. Known amounts are summed independently. 0 items in other currencies are excluded from monetary aggregates.

Cost charts

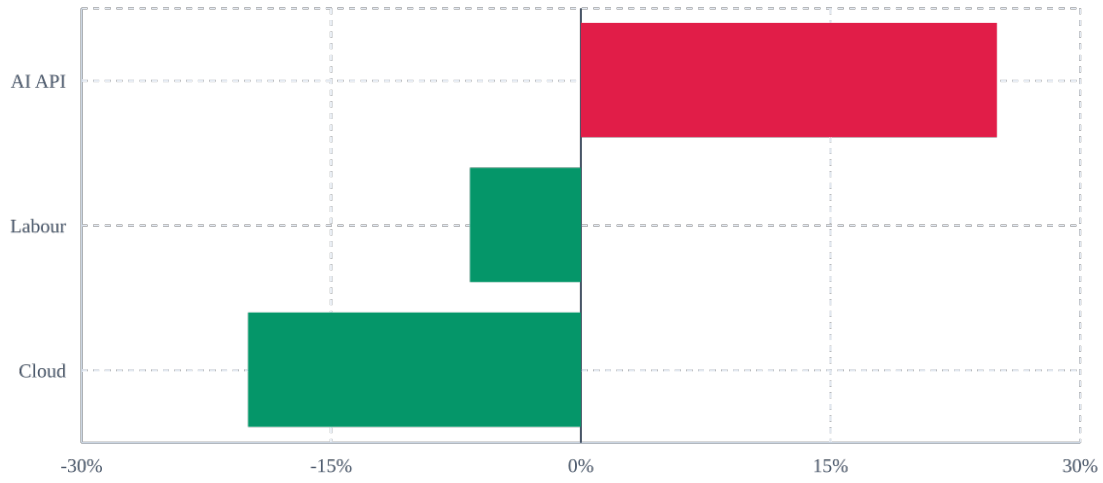

Estimated vs actual by group

Estimated Actual

Up to 12 groups shown; complete group totals follow.

Variance % by category

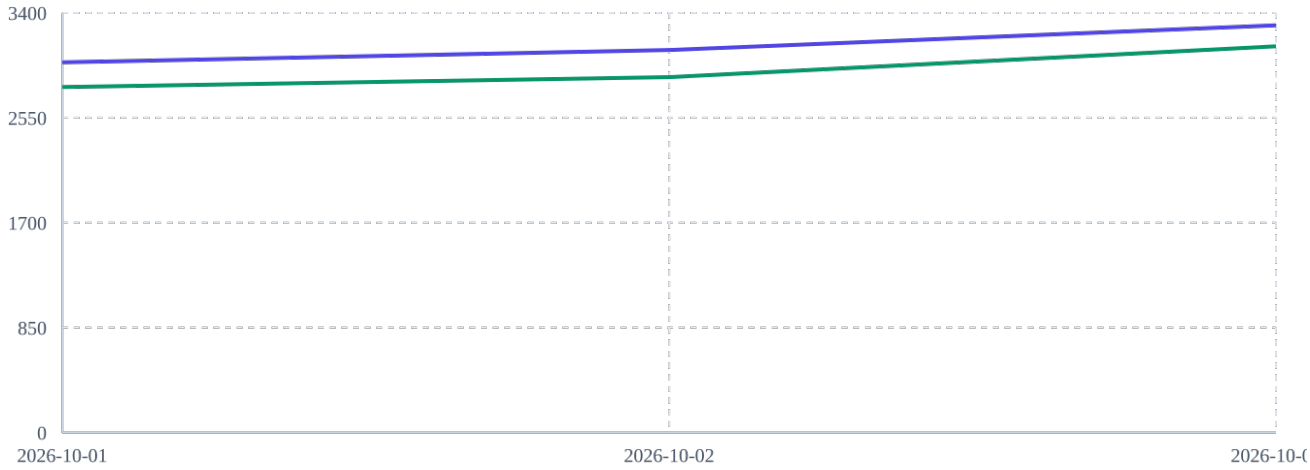

Over budget (+) Under budget (−)

Up to 10 categories shown; the tables contain all categories.

Cost charts

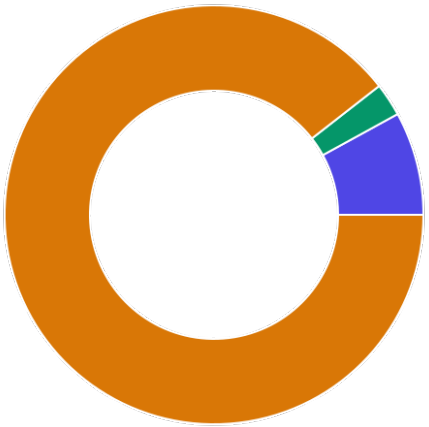

Cumulative costs over time

Estimated Actual

Known dated amounts, ordered by date.

Actual cost share by category

AI API Cloud Labour

Positive actual category costs only. Refunds remain in the tables.

Variance by group

Key	Estimated	Actual	Variance	% Variance
Build	$3,100.00	$2,880.00	-$220.00	-7.1%
Test	$200.00	$250.00	+$50.00	+25%

Variance by category

Key	Estimated	Actual	Variance	% Variance
AI API	$200.00	$250.00	+$50.00	+25%
Cloud	$100.00	$80.00	-$20.00	-20%
Labour	$3,000.00	$2,800.00	-$200.00	-6.7%

Anomalies to review (2)

Rules flag unusual values and possible data-quality issues. They do not prove an error. Group concentration alone is a medium-priority review signal.

Development · medium

More than 25% of group actual cost

Source reference: codeaudit.csv:row 2

AI API · medium

More than 25% of group actual cost

Source reference: codeaudit.csv:row 4

Appendix · Full cost table

All selected rows, including their original currencies. Variance is actual minus estimated; n/a means a percentage cannot be calculated.
